## **Global Medical Conexions Selected as BEST Re's Global Medical Network Provider**

New partnership brings cost-effective healthcare solutions from top quality worldwide facilities.

### **For Immediate Release**

**Meridian, Idaho (January 4, 2011)** – BEST Re announced today a new partnership with Global Medical Conexions (“GMCx”), an established global network of providers in the healthcare industry. Clients will be able to receive care for procedures such as heart valve replacement, hip replacement, and even cosmetic surgery from cutting-edge health centers worldwide.

This new service will be available to BEST Re clients January 4, 2011.

“Our goal is to ensure access to high quality care at affordable prices,” explained Carolyn Shepherd, Director of Sales and Marketing at BEST Re. “It is amazing how much clients can save by accessing care at a hospital from another country. The facilities are all accredited and the physicians are board certified, yet the cost of care can be up to 70% less than the US retail price for the same services.”

In addition to gaining access to an international provider network, BEST Re clients utilizing GMCx will also receive concierge service, counseling, case management, and financing options. Warranty coverage is available as an add-on and provides coverage for any related medical costs that may arise after the patient returns home.

“GMCx is a full service organization,” said Carolyn Shepherd. “Patients will get all the support they need, from selecting a location (for receiving care) to post-operative follow-up care, to make this as stress-free as possible.”

Destinations include Bangkok, Thailand, Buenos Aires, Panama, Brazil, Singapore, Israel, Costa Rica, New Zealand, Spain and Mexico. Participating medical centers are accredited by JCI or ISQua, two internationally recognized hospital accreditation agencies, and the participating physicians are board certified according to US and International standards.
